RC Mannesmann

SAVE YOUR BLUE.

RC Mannesmann Roots

Mannesmann is one of the oldest German industrial brands. Innovative entrepreneurship, social competence and sustainable action were the credo of the founding family. These are important pillars of RC Mannesmann GmbH, which was founded by its descendants. In particular, however, the responsible use of water has determined the business for more than 50 years. Because water is life.

RC Mannesmann Concept

RC Mannesmann now offers a wide range of water-saving products and items that need to be replaced regularly in sanitary applications. Simple, fast and sustainable is the guiding principle. We develop, produce and pack to the highest standards.

RC Mannesmann Future

The topics of energy and water are moving into the centre of people's consciousness. Our products make a significant contribution worldwide to saving energy, water and money without sacrificing comfort, water and money without sacrificing comfort.

AERATOR WITH INTEGRATED FLOW REGULATOR.

In order to save energy and water and at the same time distribute water evenly, RC Mannesmann constant flow regulators always ensure a constant amount of water, regardless of the line pressure, e.g. 5 litres per minute when washing hands or 10 litres per minute when showering.

Dual-core technology

Dual Core® aerators increase comfort: more water flow combined with very early aeration even at low pressures. Full and aerated jet already from 0.2 bar, from 0.7 bar, the nominal flow rate is achieved.

Maximum limescale protection

Aerator with Easy Clean function. Thanks to a soft elastomer surface, limescale deposits can be removed very easily. Simply rub the limescale off the elastomer surface*.

Theft

Do you have problems with vandalism or do you have to replace the replace aerators on a regular basis? To protect your products, there are all aerators with theft-proof mouthpieces.

Water Saving Extreme

Especially in public facilities, a lot of water and energy is consumed unnecessarily. R.C. Mannesmann offers aerators in the range of litre range of BELOW 2 litres per minute. This makes the aerator ideal for use in in-line washing facilities such as in public toilets with high visitor frequency.

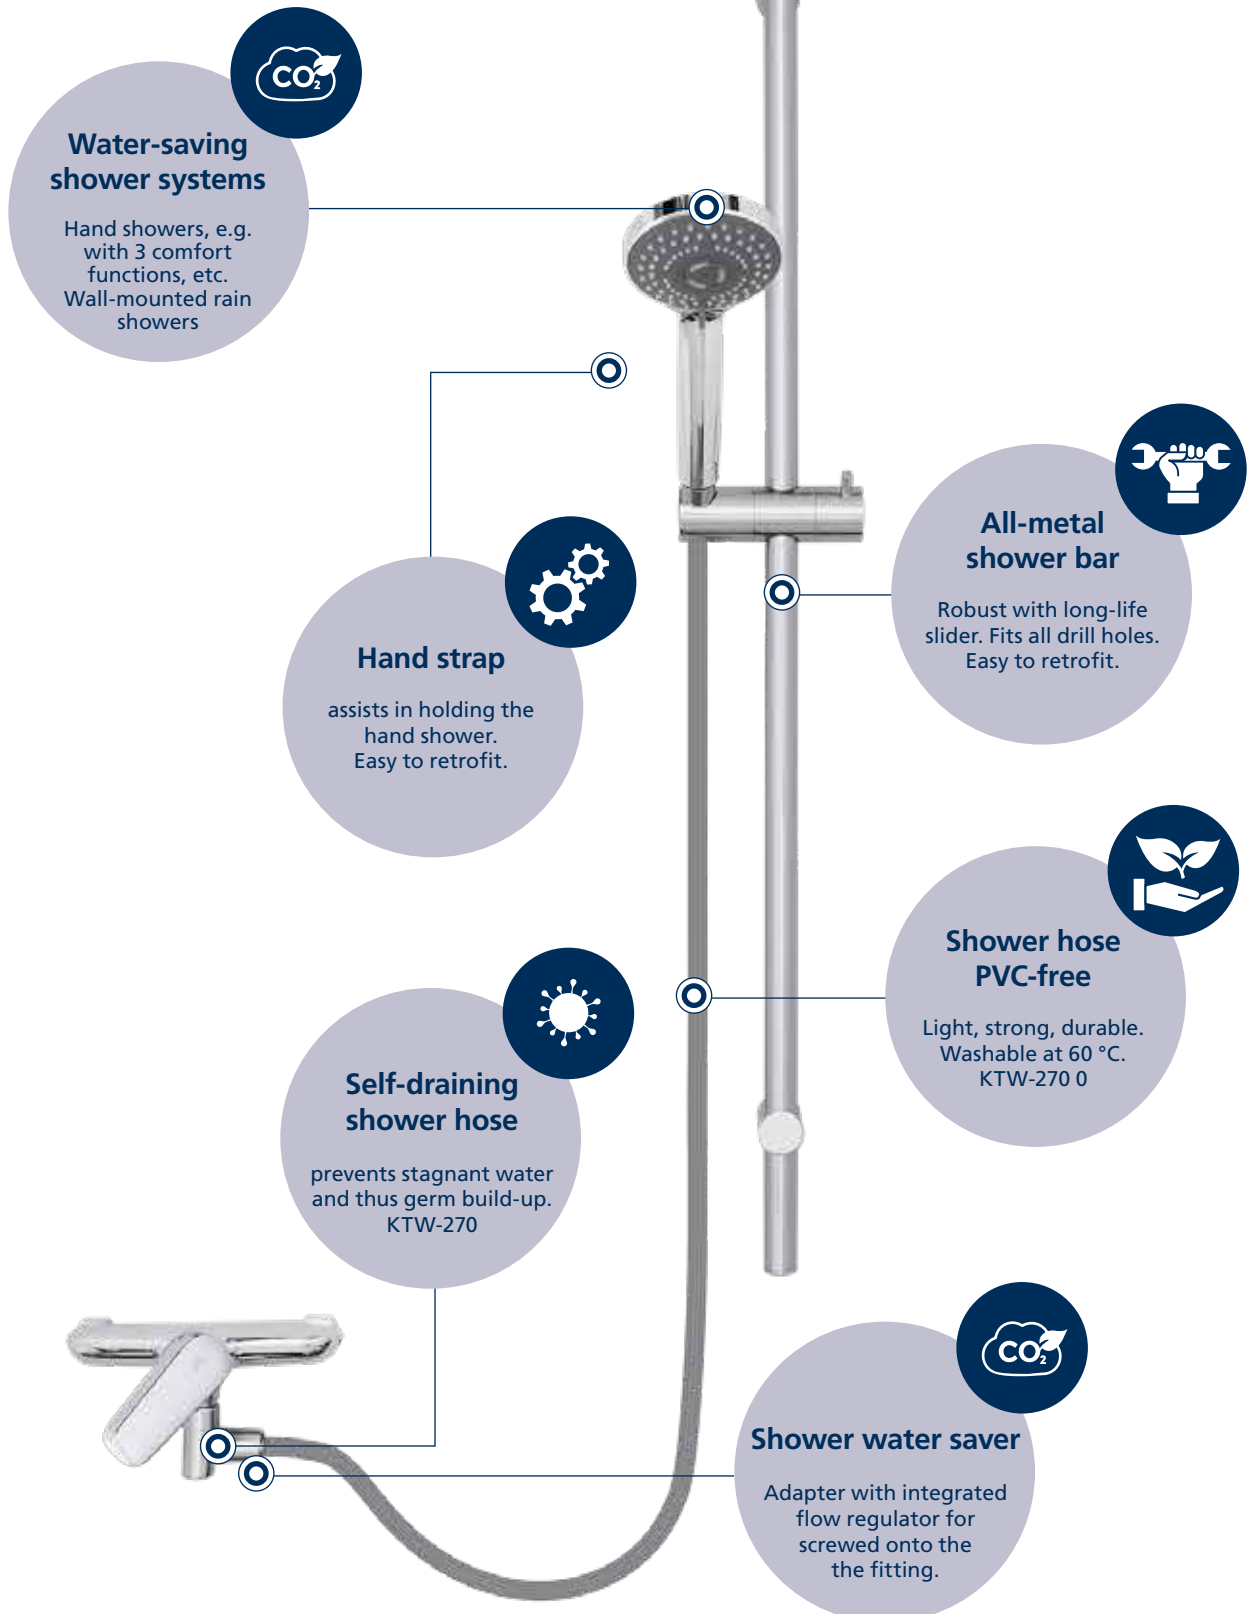

SHOWER

SHOWERS AS IT MUST BE!

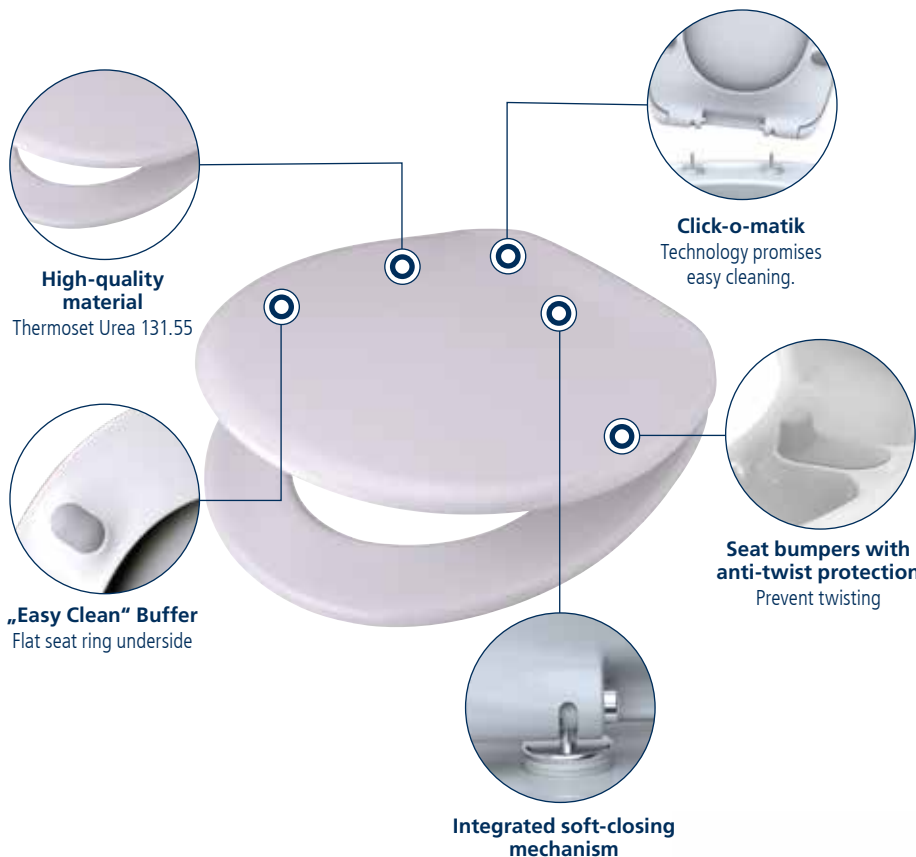

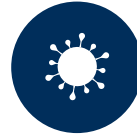

WC
